Types of Offerings:

**Presentations/Lecture/Talk:** These range anywhere from 20-40 minutes and are usually a part of a program or meeting. The talk is not geared for the listener to be taking notes and does not have information that is considered "heavy learning". Presentations are easy to understand and focused on clarifying and demystifying the topics of Feng Shui and Astrology, or used as a time for inspiration and motivation giving food for thought and life enhancing information. Depending on the topic and venue, PowerPoint presentation is used. Screen and projector provided by Alice.

**Classes:** A class is where a group of people come together to learn in a bit more depth about a topic that is offered. There are handouts, questions from the attendees as well as a more "casual" atmosphere. Generally one hour to 1½ hours depending on the topic.

**Workshops:** Longer than a class, usually 2-4 hours long where detailed information is imparted as we explore the topic in great depth, and do hands-on exercises as well. We look at practical situations that pertain to everyone and have question and answers session at the end. Take home handouts are also given. Often ended with a motivational PowerPoint presentation depending on the topic.

## Menu of Topics

This is simply a selection of titles that have been used successfully or can be used to introduce a topic. The codes (P,C,W) denote the format best suited to that title. We can work together to come up with a topic and theme that is pertinent to the audience being addressed. These are just suggestions. Keep in mind that all of my presentations, no matter what the "theme", are always infused with motivation and inspiration. I create a positive environment that is safe and designed to uplift and provide direction.
